CONCURRENT ENROLLMENT
WITH BOISE STATE UNIVERSITY
OPPORTUNITIES FOR HIGH SCHOOL STUDENTS TO EARN UNIVERSITY CREDIT
PROGRAM INFORMATION FOR STUDENTS AND PARENTS
The focus of the Boise State University Concurrent Enrollment Program is to provide students with rigorous academic courses taught by highly qualified high school instructors, all in a familiar high school environment. Through the Concurrent Enrollment program, high school students can earn Boise State University and high school credit simultaneously for collegiate-level courses offered at their high school. Credits are transferable to most other accredited colleges and universities across the United States. Concurrent Enrollment instructors use Boise State curriculum, texts, and grading scales. This academic alignment helps create a true university educational experience.

By taking advantage of concurrent enrollment, Idaho students will gain access to university courses, build confidence in their academic ability to do university coursework, and gain an early start on their college degree while still in high school.

Fast Forward - $4,125 for Idaho Students
Concurrent Enrollment has proven to be an effective way for high school students to get a successful head start in their college education. In an effort to continue this positive trend, the State of Idaho is investing in this opportunity. As of July 1, 2016, students attending Idaho public schools have access to $4,125 in state funding to pay for dual credit/concurrent enrollment courses, as well as, AP, IB, CLEP, and Professional Technical exams. To take advantage of this funding opportunity, students must complete course registration with Boise State, and also apply for funding through the Idaho State Department of Education’s Advanced Opportunities web portal. For more information on how to access Fast Forward, visit the Idaho Department of Education website at: www.sde.idaho.gov/student-engagement/advanced-ops or talk with your high school counselor.

Concurrent Enrollment Course Selection
Understanding if and how credits will transfer is important when selecting dual credit courses. Credits earned through concurrent enrollment may count toward general education requirements, major requirements, or elective credits, and this can vary based on the college the student attends after high school. Academic advising can help students and parents to make wise decisions when selecting dual credit courses. When selecting courses, students and parents should take time to understand how credits will apply to degree requirements at colleges they are interested in attending. Carefully selected courses will be more beneficial than earning a large quantity of college-level credits. Contact the Boise State Concurrent Enrollment Office for more information or to schedule an advising appointment.

Concurrent Enrollment Program (CEP) Compared to Advanced Placement (AP)
➤ Both offer challenging college-level course curriculum to high school students.
➤ Both are taught by qualified and approved high school instructors.
➤ Both offer potential for students to receive college recognition, including credit, placement, or advanced standing.
➤ CEP students earn a letter grade and credit on a college transcript based on semester-long performance with access to college resources.
➤ Credit for AP courses is granted based on a score on the AP exam. Exam score and course equivalencies will vary by college.
➤ Each has an associated cost. Concurrent Enrollment courses are $65 per credit. AP exams are $92.
